

MOAMIN ABUEWAIDA

FULLSTACK DEVELOPER

Having worked in engineering and management for over a decade, I have decided to follow my passion for programming and embark on a new career as a developer. My goal is to work alongside with innovative teams, contributing to the development and creation of unique platforms through a combination of my teamwork skills and my newly acquired technical skills.

EXPERIENCE IN TECH SECTOR

Programming coach | HACK YOU FUTURE

BRUSSELS SINCE March 2023

- Having completed the Hack Your Future bootcamp and acquired programming experience, I am now volunteering to coach and mentor new students in their classes, helping them to learn and develop their skills in the programming field as a way of giving back to the coding community. This is my way of supporting them as they take their first steps in the programming world.

Freelance Frontend DEVELOPER

BRUSSELS SINCE JANUARY 2022

- I have experience building small projects such as landing pages and dashboards using various frontend frameworks, including Vanilla JavaScript, ReactJS, and VueJS.
- I enjoy solving coding algorithms using JavaScript programming language and have practiced my skills through online programming challenge platforms.
- I am currently engaged in self-learning the Python programming language.

INTERN DEVELOPER | HACK YOUR FUTURE

BRUSSELS MARCH 21 - JAN 2022

- Gaining hands-on experience through full training and collaborative programming exercises with alumni, utilising SCRUM and Agile methodologies to effectively manage projects..
- Creation and launch of "HYF Connect" with the key responsibilities of:
 - I designed and implemented a project database using PostgreSQL and Sequelize for efficient management of database queries.
 - I built and programmed the project's backend using NodeJS and ExpressJS for smooth functioning of the server-side operations.
 - Using VueJS and Bootstrap, I developed the project's interface pages and frontend to ensure user-friendly navigation and visually appealing design.
 - I created and programmed the callback data functions and established the connection between the frontend and backend codes.
 - One of the primary goals of the project was to successfully deploy it on Heroku servers, which I accomplished.

LOGISTICS TEAM LEADER I VEEPEE

BELGIUM-LOT NOV 2019 - MAI 2020

ASSISTANT PROJECT MANAGER I STARTUP FACTORY

BELGIUM-BRUSSELS MARCH 2019 - FEB 2020

Senior Project Coordinator I ProMetal

UAE-DUBAI AUGUST 2012 - NOV 2012

ISP Telecom Engineer I Tarkeeb

UAE-DUBAI SEPT 2009 - JULY 2012

Electrical Engineer I Al Hashemi Engineering Consultant

UAE-DUBAI APRIL 2008 - SEPT 2009

STUDIES

Software Development - Coding /HYF Hack Your Future

APRIL 2021 - JAN 2022 - BRUSSELS
9-months intensive program

including Final Project. The program takes place at Epitech - Brussels and online with self-study, homework and peer learning.

Bachelor Degree in Telecommunication Engineering

Misir University for sciences and technologies

2007 - 6 OCTOBER CITY - EGYPT

Engineering Systems

ACHIEVEMENTS

- Winner of hackathons
 - Gent Nov 2021
Artevelde Hogeschool
 - Antwerp MAY 2022
Bridge Hackathon
- Startup Huddle "Gaza chapter ambassador"
- Startup Grind Gaza -
Google for startups event
